

WILL MY TENANTS BE ABLE TO USE THE BUILDING AS YOU ARE WORKING ON IT? WILL IT DISRUPT THE WORKDAY?

We get it – you need access; you need an active driveway; you can't stop operations. That's why we employ a dedicated team on the ground to direct traffic and create alternate routes. We've worked on dozens of high-traffic buildings with zero disruption.

MY BUILDING IS REALLY TALL/WIDE/ HARD-TO-ACCESS. CAN YOU STILL SERVICE IT?

Absolutely. We'll address any logistical challenges with your building...we love figuring that stuff out. It's not your problem.

WILL I LOVE IT?

YES, A THOUSAND TIMES, YES!

And we'll make sure of it. The job is not done until you are satisfied.

You invested in this building for a reason. We'll help you remember what that was – and make sure everyone else, tenant and investor alike, can see it too.

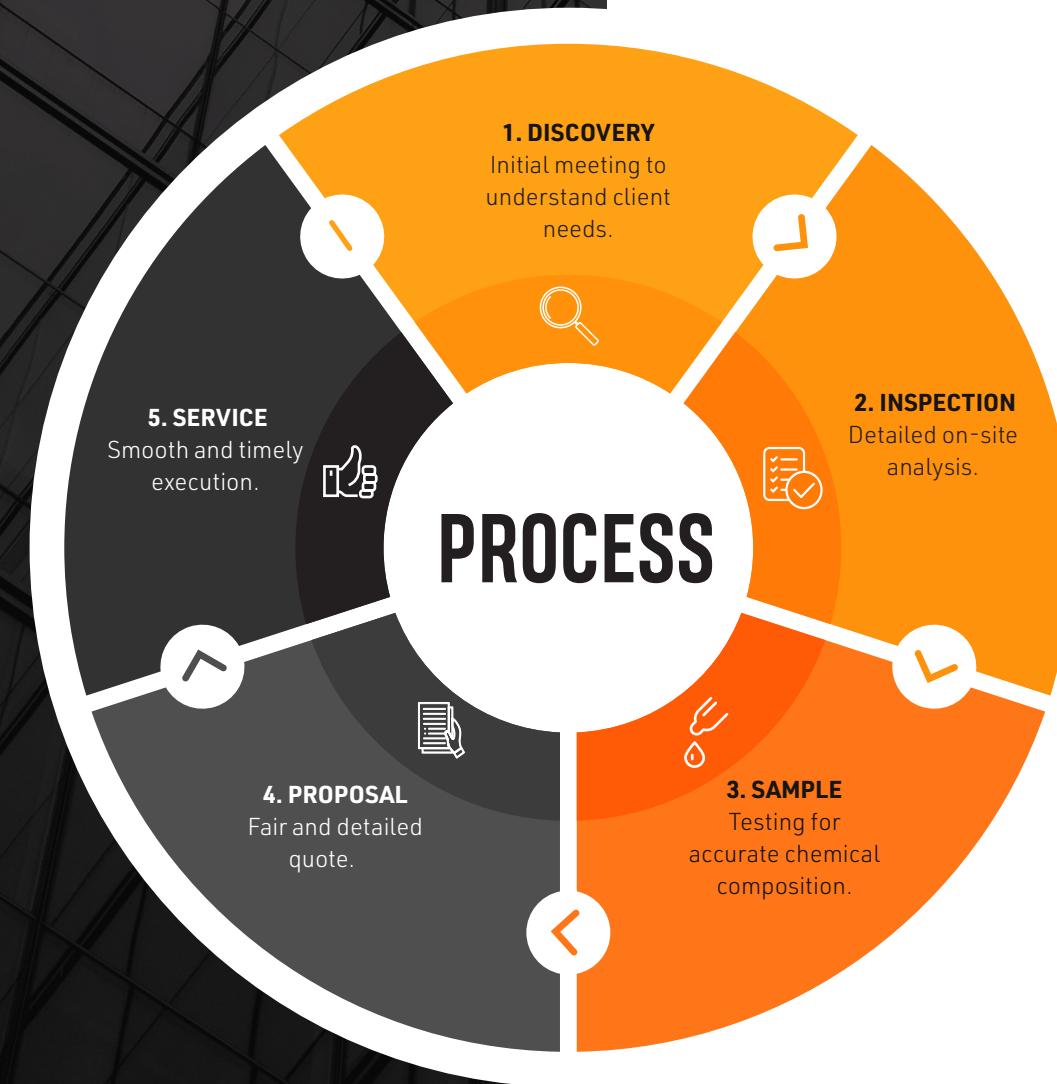

WHAT IS YOUR PRICING STRUCTURE?

Pricing for each of our services varies widely, depending on factors like:

- ✓ BUILDING ACCESS
- ✓ PROXIMITY TO PEDESTRIANS
- ✓ PROXIMITY TO OTHER CARS
- ✓ PRESENCE OF ACTIVE DRIVEWAY
- ✓ NUMBER OF STORIES

This is why we do an on-site visit. We'll assess your building and take all these factors into account to give you a customized quote.

"I COULDN'T BELIEVE HOW GORGEOUS MY BUILDING LOOKED WHEN THEY FINISHED!"

Royal Treatment did several jobs at our Pennsylvania commercial location, and I could not be any happier with their service – or the results. They literally transformed our building back to its original beauty by cleaning and power washing the exterior facade, stone, and windows. I couldn't believe how gorgeous it looked when they finished!

We hired them again for several waterproofing projects too that were highly successful.

I commend Sol for his expertise and vast knowledge of just the right material, chemical, or product for every scenario.

Pleasant and professional, Sol's wealth of knowledge is unsurpassed by any other professional I've met in the field.

I'd highly recommend this company to anyone seeking beautiful results for their building aesthetics and for any waterproofing needs.
